EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Diener on 8/2/06.

2. The application has been amended as follows:

In the Claims:

3. In claim 12, line 2 after "pulsed" insert - - ultraviolet - -. It is noted support for pulsed ultraviolet light is found on page 2, lines 20-25.
4. In claim 15, lines 5 and 6 delete ", the system further including" and insert therein - - and - -. It is noted this change is made for clarity regarding the first and second rings of the lamp.
5. In claim 15, line 6 delete "coaxial" and insert therein - - concentric - -. It is noted applicants have shown by way of the definition submitted 6/6/05 that concentric rings are those having a common axis whereby claim 17 requiring the second ring positioned closer to the DVD than the first is considered proper requiring the ring configuration shown in Figure 4. The 35 USC 112 second paragraph rejection of claim 17 is withdrawn.
6. Claims 12, 15, 17, 26, and 32 are allowed.

DRAWINGS

7. A PTO-948 indicating changes to the drawings required by the draftsman is attached.

REASONS FOR ALLOWANCE

8. The following is an examiner's statement of reasons for allowance:

Regarding claims 12 and 26:

The prior art of record fails to teach or suggest a system for processing a DVD comprising a **pulsed lamp for directing pulsed ultraviolet light** to the DVD wherein the lamp has **first and second separately energized rings, each of the first and second rings being in a different plane** with each in a plane parallel to the DVD.

Regarding claims 15, 17, and 32:

The prior art of record fails to teach or suggest a system comprising a **DVD lying in a first plane with a hole in the center, a pulsed lamp for directing pulsed light to the DVD** wherein the lamp lies in a second plane parallel to the first plane and **the lamp includes first and second concentric rings that have a different radius and are separated, and a contoured reflector positioned to reflect light from the lamp to the DVD, the reflector being configured to provide less light to the center of the DVD where the hole is located and more light to the periphery of the DVD.**

Levy (U.S. Patent 2,472,597) discloses a lamp capable of being pulsed for directing visible light wherein the lamp has first and second separately energized rings, each of the first and second rings being in a different plane (Figure 1 and Column 5, lines 1-6 and 46-50). There is no teaching or suggestion in Levy for the lamp to direct pulsed ultraviolet light. There is no

Art Unit: 1733

teaching or suggestion in Levy to include a DVD with a hole in the center or a contoured reflector configured to provide less light to the center of the DVD where the hole is located and more light to the periphery of the DVD.

Fry (U.S. Patent 2,814,721) discloses a lamp capable of being pulsed for directing visible light wherein the lamp has first and second energized rings, each of the first and second rings being in a different plane and having a different radius (Figure 2). There is no teaching or suggestion in Fry for the lamp to direct pulsed ultraviolet light. There is no teaching or suggestion in Fry to include a DVD with a hole in the center or a contoured reflector configured to provide less light to the center of the DVD where the hole is located and more light to the periphery of the DVD.

Lee et al. (U.S. Patent 5,569,928) disclose a lamp capable of being pulsed for directing ultraviolet light wherein the lamp has first and second rings (Figure 3). There is no teaching or suggestion in Lee et al. for the rings to be separately energized. There is no teaching or suggestion in Lee et al. to include a DVD with a hole in the center or a contoured reflector configured to provide less light to the center of the DVD where the hole is located and more light to the periphery of the DVD.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
